

## Astrological Moon Signs (note days color coded to calender below)

<p><b>Aries</b> (fire, masculine); Ram; Mars; Head; dry and barren</p>	<p><b>Not good for planting anything;</b> good for cultivating, destroying noxious growth and pests, weeding and harvesting.</p>
<p><b>Taurus</b> (earth, feminine); Bull; Venus; Neck/Throat; moist and fairly productive</p>	<p>Plant root crops like potatoes &amp; bulb plants; plant flowers for hardiness, beans, cabbage, lettuce, onion sets, radish, turnip, leafy vegetables and hay; set out/plant peach, pear and plum trees; perform general garden maintenance.</p>
<p><b>Gemini</b> (air, masculine); Twins; Mercury; Arms/Chest; dry and barren</p>	<p><b>Not good for planting anything;</b> good for cultivating, destroying noxious growth and pests, weeding and harvesting.</p>
<p><b>Cancer</b> (water, feminine); Crab; Moon; Breast/Stomach; moist and fruitful</p>	<p>Widely considered to be the most productive of all the signs and most frequently used for planting both above-ground and root crops. Plant seeds, transplant, irrigate, bud/graft. Asparagus, barley, beets, berries, bulbs, carrots, corn, lettuce, potatoes, roses, herbs, wheat, and deciduous trees do very well. Start compost heaps and worm farms when the moon is in the fourth quarter under Cancer.</p>
<p><b>Leo</b> (fire, masculine); Lion; Sun; Heart/Back; the most barren and dry of all the signs</p>	<p><b>No planting at all during this sign, ever.</b> Exterminate weeds and noxious growth, harvest and cultivate.</p>
<p><b>Virgo</b> (earth, feminine); Virgin; Mercury; Bowels; “Bloom Days”; moist but barren</p>	<p>Good for destroying weeds and pests. <i>Vegetables will not do well if planted in Virgo</i> (big blooms, little ‘fruit’), but it is <i>a good planting sign for most flowers and vines for large bloom yields</i>. Don't plant vegetables or trees.</p>
<p><b>Libra</b> (air, masculine); Balance; Venus; Kidneys; moist and semi-fertile</p>	<p>Used for planting crops where good pulp growth and roots are desirable; <i>another good sign for flowers and vines</i>. Plant seeds for hay, corn, fodder, grain. Flowers, bulbs, barley, beans, beet, cabbage, carrot, peas, squash, tubers and vines.</p>
<p><b>Scorpio</b> (water, feminine); Scorpion; Mars; Loins; very fruitful and moist</p>	<p>Produces sturdy, reliable plants. Plant most vegetables and flowers for large yields; excellent time to plant beans, berries, cantaloupes, cauliflower, cereal, chicory, eggplant, peas, potatoes, pumpkin; do not dig potatoes during this sign.</p>
<p><b>Sagittarius</b> (fire, masculine); Archer; Jupiter; Thighs; dry and barren</p>	<p>Some say this is a good time to plant fiery, “hot” crops such as onions, garlic, peppers, chilies and radishes (I haven't tried this theory yet);cultivate and harvest.</p>
<p><b>Capricorn</b>(earth, feminine); Goat; Saturn; Knees; productive</p>	<p>Good for most planting. Plant bulbs, potatoes, root crops, beans, cabbage, broccoli, lettuce, onion sets, radishes, flowers and fruit trees.</p>
<p><b>Aquarius</b> (air, masculine); Waterman; Uranus; Legs/Ankles; another barren and dry sign</p>	<p><b>Not good for planting anything;</b> good for harvesting, cultivation and extermination of pests.</p>
<p><b>Pisces</b> (water, feminine); Fish; Neptune; Feet; one of the most fertile signs</p>	<p>A great time for planting most types of crops, including broccoli, bulbs, Brussel sprouts, carrots, celery, chicory, cress, cucumbers, endive, horseradish, parsley, peanuts, radishes, pumpkins, flowers (for abundance) and deciduous trees.</p>

## 2011 Lunar Gardening ~ Moon Sign Calendar

Based on Central Standard Time (CST, -6 from GMT) Add one hour during Daylight Savings.  
 Dates at the top of each box in bold print are the days of the actual phase change. For example,  
 January 4, 2011, is the date of the first New Moon followed by January 12,  
 the date of the First Quarter Moon.

<b>New Moon</b> <i>Above ground crops. Start new projects.</i>	<b>1<sup>st</sup> Qtr Moon</b> <i>Above ground crops. Tend new growth.</i>	<b>Full Moon</b> <i>Root Crops. Harvest.</i>	<b>Last Qtr Moon</b> <i>Remove weeds, noxious growth, pests. Harvest.</i>
